

XTRA Heavy duty grapplesaw without tilt
 - Developed to be used on excavators.

The newest member in the Mecanil products family. This model is developed especially to be used on excavators. It is big and robust with a reinforced body and a patented new strong saw system.

FEATURES

- Fast and easy to use - increases productivity
- Extra reinforced body for rigid mounting - excavator design
- High pressure cylinder with double piston rod seals
- High tensile wear resistant steel (400 HB)
- Fitted with rotator attachment or excavator attachment (S50, S60, NTP-10 etc.)

Control system alternatives

2 double-acting hydraulic lines, grapple open/close + saw out/in

Suitable base machines

Excavators
 If you are considering installing this grapple saw on another base machine, please consult the Mecanil dealer.

Grapple claw alternatives

Universal grapple claws (with 7 claws)

Technical information
